This indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The risk assessment is based on historical data and is not guaranteed to remain unchanged. It may change over time and may not be a reliable indication of the future risk profile of the Fund. The

lowest category does not mean risk free as all investments involve risks. This Fund is ranked at 5 because funds of this type have experienced high rises and falls in value in the past. Gains or losses for individual shareholders will therefore depend on the exact timing of the subscription and redemption of shares. The Fund invests in a wide range of securities in various sectors. The Fund spreads risk by means of this diversification. The following risks may not be fully captured by the Risk and Reward Indicator:

- events over which the Fund has no control, such as political or global economic risks
- in the event that the Fund does not achieve its investment objective
