(FRN 403304)

Authorised & Regulated by the Financial Conduct Authority
12 Endeavour Square, London, E20 1JN

IMPORTANT INFORMATION

The following presentation provides information on the Yacktman U.S Equity Fund (the “Fund”), a sub-fund of Heptagon Fund ICAV which is an open-ended umbrella type investment company authorised pursuant to UCITS regulations. Heptagon Capital Limited (“Heptagon”) is the Investment Manager, Yacktman Asset Management LP (“Yacktman”) is the Sub-Investment Manager meaning Yacktman exercises discretionary investment authority over the Fund and Carne Global Fund Managers (Ireland) Limited is the Manager.

Yacktman manages the Fund according to similar investment principles and execution of approach as those used for its other offerings. However, due to certain factors including, but not limited to, differences in cash flows, fees, expenses, performance calculation methods, and portfolio sizes and composition, there may be variances between the investment returns demonstrated by the Fund and Yacktman’s other offerings.

Any performance data quoted represents past performance. Performance figures are also shown for the Russell 1000 Value Index and the S&P 500 Net Return Index (“S&P 500”). The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower expected growth rates. The Russell 1000 Index represents the 1,000 largest U.S. companies in the equity market. The S&P 500 Index is an American stock market index that includes the 500 largest companies by market capitalization. It is designed to measure performance of the broad U.S economy through changes in the aggregate market value of the 500 stocks representing all major industries.

The investment return and principal value of an investment will fluctuate so that the investor's shares, when redeemed, may be worth more or less than their original cost. Any investor should consider the investment objectives, risks and charges and expenses of the Fund carefully before investing. The Funds' prospectus and simplified prospectus contain these and other important information about the Fund. The prospectus should be read carefully before investing. Please email london@heptagon-capital.com for a free copy of these documents.

Bloomberg

2013: #3 Bloomberg's Riskless Return Ranking
2010: #3 US Diversified Equity fund⁵
2009: #1 US Diversified Equity fund⁵

Ranked #2 in US Large Cap Value Category over 15yr time frame⁶

Past performance is no guide to future performance and the value of investments and income from them can fall as well as rise.

¹ The Lipper Fund Awards program honours funds that have excelled in delivering consistently strong risk-adjusted performance, relative to peers. In addition, the Lipper Fund Awards program recognizes fund families with high average scores for all funds within a particular asset class or overall.

² The Lipper Rating for Total Return denotes a fund that has provided superior total returns (income from dividends and interest as well as capital appreciation) when compared to a group of similar funds.

³ The Lipper Rating for Consistent Return identifies a fund that has provided relatively superior consistency and risk-adjusted returns when compared to a group of similar funds. Funds which achieve high ratings for Consistent Return may be the best fit for investors who value a fund's year-to-year consistency relative to other funds in a particular peer group.

⁴ The Lipper Rating for Preservation is a fund that has demonstrates a superior ability to preserve capital in a variety of markets when compared with other funds in its asset class.

⁵ As of June 30th for the respective year. Bloomberg ranking takes into consideration year-to-date, one-year, three-year annualised and five-year annualised total returns as well as three- and five-year Sharpe ratios. Ranking includes open-end retail equity funds domiciled in the U.S. with total assets of more than \$250 million. Excludes index, contrarian, sector and market-neutral funds.

⁶ As of 30/09/2022.

INVESTMENT STRATEGY

INVESTMENT STRATEGY

The Yacktman team of Portfolio Managers consider themselves investors in businesses, not speculators in stocks. They approach the selection process as though they were buying a long-term bond, with the purpose of holding it for an extended period of time.

The main focus is on the rate of the return they would earn and the quality of those businesses. The higher the quality, the lesser the required rate of return – just like a bond investor. Clearly they don't expect exact yields to maturity, rather they build in a lot of room for error.

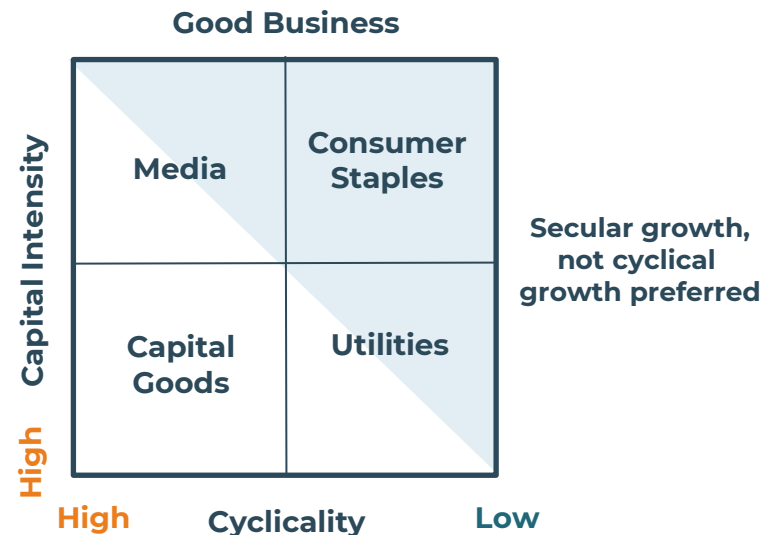

Yacktman has a tendency to shy away from **fads** and *en-vogue* companies or industries which resulted in them avoiding the TMT bubble.

Yacktman's investment philosophy focuses on purchasing quality businesses at low prices, using a three-part discipline. Yacktman believes an investor can earn attractive rates of return through investing...

... in good businesses that dominate their industry,

A good business may contain one or more of the following:

- High Market share in a principal product and/or service lines
- High cash return on tangible assets
- Relatively low capital requirements allowing a business to generate cash while growing
- Short customer repurchase cycles and long product cycles
- Unique franchise characteristics

... with shareholder-oriented management,

Yacktman believes that a shareholder-oriented management does not overcompensate itself and allocates wisely the cash the company generates. Yacktman looks for companies that:

- Reinvest in the business and still have excess cash
- Make synergistic acquisitions
- Buy back stock

At times, Yacktman will invest in a company with poor management if it is apparent that executives can be replaced or if Yacktman believes the price of the security more than compensates for the issues.

... at a low purchase price.

Yacktman looks for stocks that trade at a lower price than the sum of its parts. The stock prices of individual companies can vary significantly over short periods of time, and such price movements are not always correlated with the changes in company fundamental performance. Accordingly, Yacktman generally prefers to wait for buying opportunities. Such opportunities do not always occur in correlation with overall market performance trends.

“It’s almost always about the price.” – *Yacktman Asset Management LP*

OBJECTIVES AND GUIDELINES OF THE FUND*

- The Fund aims to achieve long-term capital growth by investing predominately in a diversified portfolio of U.S. Equities
- The Fund may hold Cash depending on the ability of the Sub-Investment Manager to identify investments that meet their valuation criteria
- The Fund may invest in, and may shift among, all market sectors
- The Fund will not use derivatives or leverage
- The Fund can selectively invest in debt instruments, typically when their rate of return is equity-like, and their risk is considerably lower than equity.

Concentration limits

Maximum of 10% in one issuer
The Fund holds ~ 50 stocks.

Maximum industry weights

Up to 25%

Expected allocation strategy

The Sub-Investment Manager seeks to allocate primarily to large cap names, however mid cap companies may be featured and there is no prescribed sectoral or style bias, however gravitation toward an overweight in consumer goods (Staples/Discretionary) is common.

**Note: Extracts from the Prospectus. The investment guidelines of the Yacktman US Equity Fund comply with those of the Irish UCITS regulations. For further information please consult the Prospectus.*

- The Sub-Investment Manager uses a number of screens to filter a universe of U.S. stocks
- The screens focus largely on valuation metrics including the expected Forward Rate of Return
- Companies with the best score may be considered for inclusion as core holdings in the portfolio
- The Sub-Investment Manager will also look at companies which measure poorly on the traditional valuation metrics: this will generate ideas for the potential inclusion in the portfolio as special situation/turnaround holdings. The Sub-Investment Manager will then spend time doing qualitative analysis in order to understand the business and sector thoroughly and decide if there may be any catalysts for change.

Position Sizes

Position size will depend on the attractiveness of a company's forward rate of return as well as its risk profile.

New positions will be built incrementally for smaller, riskier companies. However, if the opportunity warrants it, the manager may build a larger position.

The Sub-Investment Manager may employ various techniques to adjust position size, including purchase, sale, or no action in relation to fund flows.

CASE STUDIES

The two companies discussed in this document below were chosen as representations of the type of stocks held in Yacktman U.S. Equity Fund (the “Fund”). The stocks are not presented to demonstrate performance.

This information is provided by Yacktman Asset Management LP (“Yacktman”). This information is not intended to provide investment advice. Nothing herein should be construed as a solicitation, recommendation or an offer to buy, sell or hold any securities, market sectors, other investments or to adopt any investment strategy or strategies. You should assess your own investment needs based on your individual financial circumstances and investment objectives.

This material is not intended to be relied upon as a forecast or research. The opinions expressed are those of Yacktman as of February 2021 and are subject to change at any time due to changes in market or economic conditions. The following Case Study slides have not been updated since February 2021 and may not reflect recent market activity. Yacktman does not guarantee the accuracy or completeness of this information. There is no guarantee that any forecasts made will come to pass. Reliance upon information in this material is at the sole discretion of the reader.

CASE STUDY 1: SAMSUNG ELECTRONICS CO PREFERRED

SAMSUNG

- Samsung Electronics (Samsung) is the second largest technology company in the world by sales. It is a global leader with a strong market position in semiconductors, (memory and foundry) mobile, display, and consumer electronics. Samsung also has a significant presence in emerging new markets like 5G, artificial intelligence, and the internet of things, among others. Currency is not a significant issue because many of its businesses are transacted in dollars.
- Samsung sells at a steep discount to global technology and appears to be poised for a period of high growth in its semiconductor business. The company has amassed far more cash than it needs, with cash and investments exceeding \$100 billion.
- The Lee family, who controls the company, was recently assessed with a significant estate tax bill that could approach \$10 billion. As a result, we think there is a strong incentive to have a higher stock price. If future share sales are needed to pay the estate tax, maximizing ownership of the company while getting liquidity will be important.
- We believe the company is positioned for extremely strong earnings growth in 2021-2022. The combination of strong business results, better capital allocation, and motivation for a higher valuation could create an exceptional stock performance in the coming years.
- This stock was first purchased in the Yacktman US Equity Fund on 20/06/2014.

Past performance is no guide to future performance and the value of investments and income from them can fall as well as rise.

CASE STUDY 2: BOLLORÉ

- Bolloré is a French conglomerate with exposure to high-quality businesses in communications, transportation, and logistics, plus electricity and storage systems. The company is controlled by an outstanding capital allocator and we believe it is mispriced in part due to a complicated shareholder structure which significantly overstates the net shares outstanding. At the current valuation, much of the share price is from Bolloré's economic exposure to Universal Music Group (through its ownership stake in Vivendi) which we expect to be a US-listed company by the end of 2022.
- Additional businesses, including port and logistics, are worth significantly more than the debt and are stable. Also, Bolloré made a substantial investment in a solid-state electric vehicle (EV) battery business. This EV battery is more environmentally friendly than lithium ion and safer as it is not prone to catch fire. Mercedes-Benz uses the EV battery in its buses currently. The technology is more advanced than many competitors with considerable valuations in today's environment. Bolloré is very inexpensive with the battery business at zero value; however, we anticipate massive upside if the EV battery business is monetised or its value is recognised over the long-term.
- Bolloré is a good steward of its capital. It benefits from low corporate capital gains tax rates when monetising the gains. This allows the company to take positions, recognise the value, sell, and move to another investment - hallmarks of an efficient and profitable company.
- This stock was first purchased in the Yacktman US Equity Fund on 30/10/2018.

Past performance is no guide to future performance and the value of investments and income from them can fall as well as rise.

DISCLAIMER

Heptagon Capital Limited, Heptagon Capital LLP and its affiliate companies and its members, officers, employees, agents and advisors disclaim any and all liability relating to these materials, except to the extent required by applicable law or regulations, including, without limitation, any express or implied representations or warranties for statements or errors contained in, and omissions from, these materials. Certain assumptions have been made, and/or parameters set, in the preparation of these materials which have resulted in the returns detailed herein, and no representation or warranty is made that any returns indicated will be achieved. Changes to assumptions or parameters may have a material impact on the returns detailed. This document should not be copied to any other person without our express consent. This document should not be considered an offer to buy or sell investments.

Heptagon Capital Limited has issued this communication as investment manager for Heptagon Fund ICAV (the "ICAV"), an umbrella fund with segregated liability between sub-funds (the "Funds") and authorised pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended, and is licensed to conduct investment services by the Malta Financial Services Authority. Heptagon Capital LLP is authorised and regulated in the UK by the Financial Conduct Authority and is the sub-investment manager for a number of the Funds.

The results given in this document are based solely upon historical fund performance as gathered and supplied by Brown Brothers Harriman Fund Administration Services (Ireland) Limited, the ICAV's administrator, Bloomberg and Morningstar. That past performance has not been independently verified by either Heptagon Capital Limited or Heptagon Capital LLP. It is not intended to predict or depict the future performance of any investment.

The information contained herein is provided for informational purposes only, is not complete, and does not contain certain material information about the Funds, including important disclosures and risk factors associated with an investment in the Funds. Before making an investment in any Fund, prospective investors are advised to thoroughly and carefully review the ICAV's [Prospectus](#) (the "Prospectus") as well as the supplement to the Prospectus for the Fund and the Fund's key investor information document with their financial, legal and tax advisors to determine whether an investment is suitable for them. An investment in the Funds is not suitable for all investors.

The distribution of information contained herein and the sale of shares in the Funds may be subject to legal or regulatory restrictions in certain countries in which applicants for shares are resident or of which they are citizens. In particular, neither the shares in the Funds nor the Funds themselves have been registered under any United States ("US") Securities legislation and are not available for purchase by US persons (as defined in the Prospectus).

The Yacktman US Equity Fund takes sustainability risks into account within the investment process, and this is disclosed in accordance with Article 6 requirements of the EU's Sustainable Finance Disclosure Regulation. However, the Fund does not have as its objective sustainable investment and does not promote environmental or social characteristics for the purposes of the EU's Sustainable Finance Disclosure Regulation.
